

U.S. AIR FORCE

Sheppard AFB Environmental, Safety, and Occupational Health Policy

"Committed to Continual Improvements"

Initiate programs dedicated to continual improvement. We will continue to respect health and the environment, as well as our community partners. We will continue to foster a spirit of cooperation by building relationships with regulatory agencies, interest groups, stakeholders, and our community to engender collaboration, cooperation, and mutual understanding. We will continue to provide a cleaner and safer environment through the education, support and involvement of all personnel through environmental compliance, prevention of pollution, and conservation of natural and cultural resources. Sheppard AFB will continue to implement this policy in its respective organizations, down to the lowest level. We will continue our policies of improvement, measurement, and evaluation through our Environmental, Safety and Occupational Health Council (ESOHC) organizational structure.

Maintain safe and healthy work and living conditions. Sheppard AFB will continue its effective safety and occupational health initiatives by taking all reasonable steps to prevent work-related ill health, and to support the general health and well-being of its employees; and (a) provide adequate control of the health and safety risks arising from our work activities (b) provide information, instruction and supervision for employees, (c) prevent accidents and cases of work-related ill health, and (d) maintain safe and healthy working conditions.

Prevent Pollution. Sheppard AFB will continue its effective "Compliance Through Pollution Prevention" initiatives by (a) eliminating compliance sites through process elimination or reduction, to the maximum extent possible, (b) reduce hazardous material purchases and use through process changes or reduction, product substitution, and proper material management procedures, (c) reduce solid waste disposal through aggressive recycling efforts, and (d) maximize purchase of supplies and materials containing recycled content products.

Reduce the use of non-renewable resources through conservation and alternatives. We will initiate actions to reduce the consumption of petroleum products and reduce the use of electricity, gas, and water.

Obey all laws, rules and regulations. Sheppard AFB will comply with all federal, state, and local environmental regulatory requirements, as well as all Department of Defense, Air Force, Air Education and Training Command, local and Sheppard AFB regulations, instructions, policies, plans, and directives.

Volunteer in community activities. We will continue Sheppard AFB's long standing community relations activities by sharing our commitments through participation and/or sponsorship in community events such as Safety Day, Earth Day, Science Fairs, and classrooms, and other available opportunities.

Eliminate risks. Sheppard AFB will continue to eliminate risks in the work, living, and off-duty locations through sound education.

Compliance with the commitments contained within this policy shall be the responsibility of all members of Sheppard AFB, including all military, civilians, contractors, and tenants.

ROBERT F. HAAS, JR., Colonel, USAF
Commander, 80th Flying Training Wing

KENYON K. BELL
Brigadier General, USAF
Commander, 82d Training Wing
